

Benefits of CI/CD

Reduces Cost:

- Developers will spend less integrating new code, which will lead to more time developing new features.
- Less costs from unused infrastructures, only pay for what you use.
- Less human error because everything is automated means less time debugging and more time working on new code.
- Less bugs in production, less time debugging.

Increases Cost:

- Less time to market, new features ship out quicker.
- Production error can be quickly spotted and rolled back.
- Less bugs equals less downtime
